## Speaker

Myung-Sook Park  
Principal Research Scientist, KIOST

## Abstract

Over two decades, we will accumulate data from Korean geostationary satellite missions (COMS and GK/2A•B).

The scopes of the seminar will cover

- 1) Ongoing advancements in GOCI-II technology, focused on constructing climate data records from individual mission; and
- 2) Analysis and diagnosis of valuable climate and weather processes extracted from satellite data.
