Speaker

Hyung Chul Yoon
Korea Institute of Energy Research, Principal Researcher

Abstract

- The demand for clean ammonia is expected to surge by 190% to 500% by 2050 in industries including shipping fuel, hydrogen carriers, and carbon-free fuel.
- This seminar offers insights into the latest R&D trends in green ammonia production and its application in decarbonizing existing carbon-based fuel industries.

The seminar will be in English.
